Based on PR [2977](#)

Critical Log Messages

This document contains all occurrences of [CRITICAL] log messages in the codebase.

Summary

All critical log messages in the codebase automatically include the [CRITICAL] prefix through:

- **C#:** `LogCritical` extension method
- **TypeScript:** `Logger.critical()` method

Contact List

For all ongoing or critical incidents please send an email to all 27G contacts and the effected vendor

- 27G Consulting Director - John Marney john.marney@27global.com
- 27G Consulting Manager - Collin Hulon collin.hulon@27global.com
- 27G Consultant - Drew Pllum andrew.pellum@27global.com
- 27G Architect - Kelly Fisher kelly.fisher@27global.com
- 27G Cloud Engineer - Matt Huisman matt.huisman@27global.com
- Usio Support - tech.support@usio.com
- Twilio - Support ticket can be submitted via portal <https://console.twilio.com/>
- Stripe - Support ticket can be submitted via portal <https://dashboard.stripe.com/>
- Yelp - They do not have a public or private facing support
- Google - They do not have a public or private facing support
- FlipGive - Just contact internal 27G list

Incident Management

- For all incidents please create an "Issue" type in the GCM ADO and log all findings and information there. For overnight (US Time) issues, if needed please escalate to the Emesoft Dev/Cloud resources who have more knowledge of the project. If an Usio outage occurs please purchase a card in the affected environment while the outage is occurring. This allows us to have a test card should we need to fix anything post outage. Please see this [page](#) for steps that have occurred in a past outage.

Critical Log Messages

File Path	Log Message
apps\gcm-common\DataAccess\RdsIamConnectionInterceptor.cs	Failed to refresh IAM token for databa '{DbName}'
	Failed to fall back to standard connec string for database '{DbName}'
	Failed to update connection string for '{DbName}'
	DefaultConnection string not found in configuration
apps\gcm-common\DataAccess\ConnectionUtil.cs	IAM authentication failed for database {DatabaseName}. Falling back to standa connection string.
apps\otp-redemption-service\messaging-service\Service\TwilioService.cs	Twilio message error for {Sid}: {Error {ErrorMessage}}
	Failed to get Twilio redemption status {Sid}
	Failed to send SMS via {SmsProvider} t {PhoneNumber}
	Failed to send Twilio message to {Phon Error Code: {ErrorCode}, Message: {ErrorMessage}
	Unexpected error sending Twilio messag {PhoneNumber}
	Twilio SMS failed for {PhoneNumber}: {ErrorCode} - {ErrorMessage}
apps\otp-redemption-service\messaging-service\Service\SendGridService.cs	Failed to send email to {RecipientEmai SendGrid: {StatusCode}
	Failed to send email via SendGrid to {RecipientEmail}
apps\otp-redemption-service\messaging-service\Service\AmazonSesService.cs:51	Failed to send email via {EmailProvide {RecipientEmail}

File Path	Log Message
apps\search-service\search-service\Infrastructure\YelpApi\YelpSearchProviderPlugin.cs	Failed to get business summary for {BusinessAlias} from Yelp API: Response
	Failed to get business summary for {BusinessAlias} from Yelp API: {Error}
	Failed to get business summary for {BusinessAlias} from Yelp API: Entities
apps\search-service\search-service\Infrastructure\Clients\YelpClient.cs	Yelp search request failed for provide parameters {@SearchParameters}
	Failed to retrieve Yelp business detail {BusinessId}
	Failed to retrieve Yelp business summary {BusinessId}
apps\search-service\search-service\Infrastructure\Clients\GooglePlacesClient.cs	Google SearchBusinessesAllAsync fail, searchParameters: {@Parameters}
	Google GetBusinessAsync fail, placeId: {PlaceId}
apps\otp-redemption-service\provisioning-service\Infrastructure\Util\UsioCredentialUtil.cs	Usio credentials not found for partner {PartnerId}
	Failed to load Usio configuration: {Me
	Usio credentials not found for partner {PartnerConfigKey}
	Usio partner configuration '{PartnerCo is missing required credential fields
apps\otp-redemption-service\otp-redemption-service\Controllers\GeoIpController.cs	GeoLocationFromMaxMind failed for IP:
	GeoLocationFromGoogle failed for Latit {Latitude}, Longitude: {Longitude}
apps\otp-redemption-service\provisioning-service\Infrastructure\Clients\UsioClient.cs	Usio gift-card/order FAILED for provis card {ProvisionedCardId} after {Duratio Response: {@Response}

File Path	Log Message
	Usio card creation failed for provision {ProvisionedCardId} with request {@CreateCardRequest}
	Usio virtual card collection failed for {@CollectVirtualRequest}
	Usio card/prefunded/load FAILED for provision card {ProvisionedCardId} after {Duration}
	Usio card funding failed for provision {ProvisionedCardId}, card ID {CardId}, {Amount}
	Usio bulk card creation failed with request Success={Success}, ErrorMessage={ErrorMessage}
	Usio phone number change failed for request {@ChangePhoneRequest}
	Usio SSO login failed for username {Username} with status {StatusCode} for provision {ProvisionedCardId}
	Usio SSO login failed - null response username {Username}
	Usio SSO login failed for username {Username} with card program {CardProgram}
	Usio get card number failed for username {Username}
	Usio change PIN failed for username {Username}
	Usio card status update failed for request {@UpdateCardRequest}
	Usio card closure failed - card cannot be closed for username {Username}
	Usio card closure failed for username {Username}

File Path	Log Message
	Usio balance check failed for username {Username}
	Usio admin login failed – null respons distributor {DistributorId}
	Usio card closure eligibility check fa username {Username}
	Usio {OperationName} returned null res
	Usio {OperationName} request failed fo {Context}
	Usio {OperationName} FAILED for {Conte {Duration}ms
	All Usio login attempts failed for pro card {ProvisionedCardId} after trying : different username/password combination
apps\otp-redemption-service\provisioning-service\Infrastructure\Service\S3Operator.cs	Failed to upload file {FileName} to S3 {BucketName}
	Failed to download file {FileName} fro bucket {BucketName}
apps\storefront\src\modules\google-captcha\index.ts	Error checking Google Recaptcha state:
	Failed to load Google Recaptcha script
apps\storefront\src\app\api\log-critical\route.ts	[CLIENT] \${message} (relayed from clien
	[CLIENT] \${message} (relayed from clien
apps\medusa-store\src\subscribers\flipGiveNotifierSubscriber.ts	[FlipGive] handleCreateTransaction fai order_id: '\${data.orderId}'. Payment is available.
	[FlipGive] handleCreateTransaction fai order_id: '\${data.orderId}'. \${error}
	[FlipGive] handleCreateTransaction fai order_id: '\${data.orderId}'. \${resp.me: \${JSON.stringify(resp.fields)}}

File Path	Log Message
apps\medusa-store\src\services\fiservService.ts	Fiserv webhook error.
	AuthorizeSession failed. Did not receive expected data from paymentjs server during authorize session
	Checkout failed. Did not receive data from Fiserv webhook or webhook returned error
	[Fiserv] Fraud ScoreOnly/fraudClientRegistration failed transaction blocked
	[Fiserv] Fraud registration details:
	[Fiserv] Fraud ScoreOnly/TransactionAuthorization failed payment blocked by fraud detection
	[Fiserv] Fraud authorization details:
	Payment NOT approved. Transaction Status: \${paymentStatus?.payment?.transactionStatus} paymentStatus?.payment?.data?.transactionStatus: ?? 'unknown'}
	Payment error:
	Forward webhook to url "\${url}" failed with error: \${e.message}
	the request body is missing or incorrect for the endpoint
	gateway credentials failed
	gateway connection error
	the request was rejected by the gateway
	[ERROR] [Fiserv] Fiserv payment error.

File Path	Log Message
apps\medusa-store\src\api\routes\geolocation\geolocation.ts	Error getting geolocation latitude=\${req.params?.latitude}, longitude=\${req.params?.longitude}: \${e}
apps\medusa-store\src\api\stripe\intents.ts	[Stripe Intents Retry] Non-retriable p processing error in \${context}:
	[Stripe Intents Retry] Error type: \${t error}
	[Stripe Intents Retry] Error message: \${error?.message 'No message'}
	[Stripe Intents Retry] Error code: \${error?.code 'No code'}
	[Stripe Intents Retry] Error stack:
	[Stripe Intents Retry] Full error obje
	[Stripe Intents Retry] Max attempts (\${config.maxAttempts}) reached for pay processing \${context} – transaction fa: permanently
	[Stripe Intents] Invalid webhook body received – type: \${typeof req.body}
	[Stripe Intents] No CartId in Metadata \${paymentIntentId}, rawCartId: "\${rawCa type: \${typeof rawCartId}, metadata: \${JSON.stringify(metadata)}
	[Stripe Intents] CartId empty after tr \${paymentIntentId}, original: "\${rawCa
	[Stripe Intents] Failed to retrieve ca \${cartId}:
	[Stripe Intents] Failed to clean up ol sessions – may cause payment completio
	[Stripe Intents] Failed to re-fetch ca \${cartId} after payment session cleanup \${refetchError?.message}

File Path	Log Message
	[Stripe Intents] Failed to update cart payment:
	[Stripe Intents] Failed to capture pay order \${order.id}:
	[Stripe Intents] Order creation failed permanently for cart \${cartId} after a attempts – payment succeeded but order created
	[Stripe Intents] Critical error in web handler – payment processing failed:
	[Stripe Intents] Error type: \${typeof
	[Stripe Intents] Error message: \${error?.message 'No message'}
	[Stripe Intents] Error code: \${error?. 'No code'}
	[Stripe Intents] Error statusCode: \${error?.statusCode 'No statusCode'}
	[Stripe Intents] Error stack:
	[Stripe Intents] Full error object:
	[Stripe Intents] Could not stringify e object
	[Stripe Intents] Conflict error persis all retries, returning 500 for Stripe i
	[Stripe Intents] Stripe Intents Error, returning 500 to Stripe
apps\medusa-store\src\api (POST /store/carts/{cart_id} , discount-apply)	duplicate key value violates unique co "IDX_bf701b88d2041392a288785ada"

Notes

- All messages with template parameters (e.g., {PartnerId} , {Message}) are structured log messages where the placeholders are filled at runtime.
- Messages prefixed with [CRITICAL] are automatically added by the logging framework.
- The client-side loggers (apps\storefront and apps\redemption-ui) also send critical messages to server-side endpoints for centralized logging.
